

CHRONICLE - DAS - FBI NA-MEMORIES

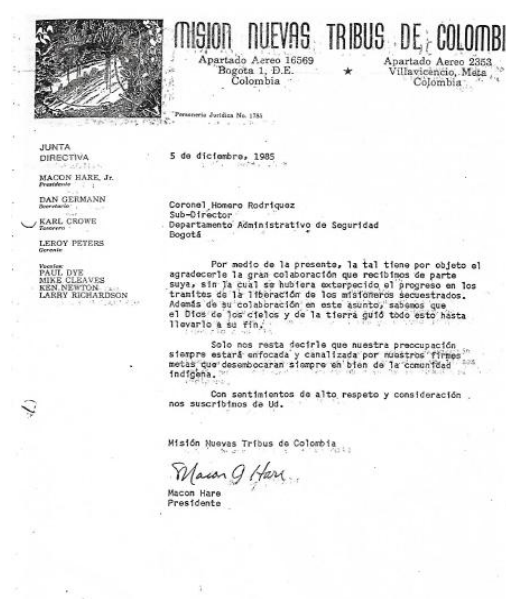

COLONEL HOMERO RODRIGUEZ "RAY"

FBI NA AND DAS MEMORIES INTERNATIONAL AIR SKYJACK

When I retired from the Army in 1984, I joined the Administrative Department of Security DAS, Intelligence agency of the Presidency of the Republic, initially as Deputy Director of the Higher Academy of Intelligence in Aquimindia and in 1985 as Deputy Director of the Central Intelligence.

In that year the FARC kidnapped four Missionaries of New Tribes of Colombia, US citizens for whom they were asking for US\$ 5,000,000 ransom, threatening to kill them

General Miguel Maza, Director of the DAS ordered me to contact the Legal Attaché of the United States Embassy Donald Cubisson (FBI) and support the operations for the victims rescue. Then I designed a Special Operation that

was approved and working shoulder to shoulder with the LEGAT we achieved the safe and sound liberation of the missionaries, without paying ransom.

The American Government invited me to attend the FBI National Academy in Quántico, Virginia to advance Session 145 in 1986, a course until then exclusively for National Police Officers.

FBI NATIONAL ACADEMY- ARUBA CREATION OF LATIN AMERICA CARIBBEAN CHAPTER 1987

Since then, as a graduate, I am part of the FBI NAA, an organization that brings together around 28,000 Officers from more than 100 countries in the world.

In 1987 I participated in the founding of the Latin American and Caribbean Chapter in Aruba and for over twenty years I was an officer in the positions of Secretary Treasurer, Vice President, President, Past President and Executive Secretary Treasurer, obtaining the nomination of the retraining for Colombia , which was carried out with great success in Cartagena in May 2010 with the support and sponsorship of General Oscar Naranjo, Director of the National Police.

CARTAGENA RETRAINING 2010 GRAL DOUGLAS FRAZER

The FBINAA has been very positive for the development of inter-agency and personal relationships of graduate officers from around the world; A great experience was on May 23, 1988 when Gonzalo Carreño Nieto hijacked an Avianca plane with a gun and a grenade that turned out to be a toy, the aircraft was diverted to Medellin and Panama as the hijacker intended to be taken to Cuba, then He flew to Aruba and the authorities led by Commissioner Roland Peterson attended the crisis incident (The previous year we had created the Latin American and Caribbean Chapter of the FBI NAA on the island).

Having established the tactical position and when contacting the kidnapper, in the case of a Colombian plane, Roland called me on the phone, made contact and handled the incident directly between my CIAES office (Information Center for Anti-extortion and Kidnapping of the General Command of the Military Forces) and the Aruba Police, advancing the necessary coordination with other committed agencies and this came to a happy end with the capture of the criminal even though he got off at the beginning of the runway of the

Cartagena airport where the Police already had provided the respective perimeter control. The Operational success was a result of the quick reaction, to share the information and direct coordination through the net that we formed for the support to our respective countries. Thanks to the Lord of the Armies we had the great opportunity to receive the training in the National Academy of the FBI and to enter this great family of world coverage.
